Abstract: What do we mean by optimizing the socio-economic and spiritual-ethical foundations of building an enlightened state in new Uzbekistan, what should we pay attention to, what creative ideas will give us strength, unlimited knowledge, guaranteed knowledge for our youth We understand such phenomena as the right to education and a decent and healthy lifestyle in the future, as well as the provision of rights to every citizen based on the rule of law. In this regard, our updated Constitution, adopted recently, first of all, according to the above main ideological content, expresses that New Uzbekistan, which is being built in our country, is an enlightened state, and all efforts in our country are aimed at this. Representatives of different classes of people in the world and in our country often discuss the question of what kind of society we live in, whether we are moving towards a secular state or a religious society. Our main values are love, peace and kindness. In recent years, the importance of education, medicine, and various spheres of social life, especially the values of the holy religion of Islam, increases the urgency of this question. Therefore, in this article, we want to think about the essence of the new state and enlightened society, which is being built in the new Uzbek language.

Keywords: dukhovnost, dukhovnoe prostranstvo, grajdanskoe obshchestvo, tsennosti, dukhovnoe obnovenie, pravo, svoboda, prosveshchennoe obshchestvo, prosveshchennoe gosudarstvo.

Introduction

President Shavkat Mirziyoev developed the mechanism of raising the human factor as a sacred value in new Uzbekistan, building an enlightened society that makes people educated, happy, free and prosperous. According to him, this mechanism is the spiritual and educational perfection of a person, that is, the continuous development of oneself, the ability to live in harmony in society, to see others as equal to oneself, to understand the culture of love, peace and goodness as the main value, not the culture of power. based on It is not a secret to anyone that in today's global space, mutual competition, various political, economic and ideological contradictions are extremely strong, the role and importance of education of the young generation is increasing more than ever. Nowadays, most people look at the word "ideology" a little hesitantly, considering it alien to a democratic society. But when we say ideology, we first of all understand the education of thought, the education of national and universal human values. In this regard, I would like to emphasize: President Shavkat Mirziyoyev emphasized that the ideology of the New Uzbekistan that we are building will be, first of all, the ideology of humanity, goodness and creativity.[1].

Methods

The idea of building an enlightened society was first brought to the public's attention by Shavkat Mirziyoev in 2016 at a meeting with voters in Kashkadarya region. The leader of our country emphasized that the family and the example of parents, which are the basis of society, and their personal example in the upbringing of children, are the basis of our spiritual growth. Also, the works

of the President of the Republic of Uzbekistan, as well as newspapers, magazines, and Internet sources were included in the scientific research work.

Results and Discussion

On September 19, 2017, the head of our country made a proposal to adopt a special resolution known as "Enlightenment and religious tolerance" at the 72nd session of the United Nations General Assembly. It was noted that the important goal of this legal framework is to help ensure everyone's right to education, eliminate illiteracy and ignorance. It is not just about building an enlightened society in one country, but about building a high spiritual worldview and a healthy way of life all over the world. This requires a complete abandonment of the policy of achieving goals through the use of force and violence, and a transition to a policy of living a way of life through the pursuit of peace. The logic of today's international politics in the world confirms how global this problem is. After all, as the President emphasized, the growing threat of terrorism in the world, especially in recent years, shows that the method of fighting against them by using force is not justified.

Also, at the UN session, the head of our state drew the attention of the world public to the concept of "enlightened Islam" and justified the need to spread the teachings of enlightened Islam in our holy religion. At the meeting of the video selector held under the chairmanship of the President on January 19, 2021 on the issues of fundamental improvement of the system of spiritual and educational work and strengthening the cooperation of state and public organizations in this regard, he emphasized that the driving force of building an enlightened society is the developed human potential. [2] That is, there are three structural aspects of achieving educational perfection, which is the core of an enlightened state and society. These three aspects are the factors of knowledge, work and intelligence, and they are effective only when they are in active harmony with each other. As we build an enlightened society in New Uzbekistan, we first of all consider the reforms implemented in our country and the transformation of today's phenomenon of spirituality into a strong spirituality. "Today's spirituality" is emerging as a protective tool to warn more people about the spread of ideological and ideological influences that have a negative impact on the minds and ways of thinking, about the increase of various internal and external threats, and at the same time, to save the society from these calamities. "Strong spirituality" requires relying on the mind and the mind, which are important for a person, as well as on the spirit. Mind is a result, a unique spiritual ability that allows a person to think, reason, understand, remember, draw conclusions. Globalization of today's world, excessive flow of information makes it a reality that it is possible to ensure the purity of the nation and the stability of the country only with common sense and loyalty to good ideas. In this sense, a strong spirituality indicates that it is appropriate to rely only and only on reason when determining a person's attitude to the world and evaluating his actions.[3] Also, as one of the most important steps in building an enlightened society in New Uzbekistan, on May 3, 2019, "On additional measures to increase the effectiveness of spiritual and educational work", 2021 - the meeting of the Republican Council of Spirituality and Enlightenment held on January 19 in the form of a video selector, on March 26, 2021 "Measures for the fundamental improvement of the system of spiritual and educational affairs are correct It is no exaggeration to acknowledge the decision of the President. Based on these decisions, the main directions of the activity of the Council of Spirituality and Enlightenment of the Republic were determined. The program of measures to further increase the effectiveness of spiritual and educational work, to raise the intellectual potential and worldview of the population, and to strengthen their ideological immunity was approved.. As part of the program, the "Spirituality Festival" and "The Most Active Spiritual Propagator of the Year" competition will be held throughout the republic. A list of "100 must-read books this year" will be compiled. The Republican Spirituality and Enlightenment Center is the working body of the Republican Council, its regional departments and divisions of the relevant regional councils. In accordance with the decision, the concept of continuous spiritual education and the method of determining the state of the socio-spiritual environment in the society and targeted rehabilitation will be developed. Employees responsible for spiritual and educational work are trained at the "Promoter of Spirituality" educational institution under the Center. With the decision, the "Spiritual Devotee" badge was established. In

order to increase attention to the education of young people, to prevent the violations committed by them, to organize meetings of students with difficult upbringing in all educational institutions with representatives of the honorable generation who have earned the respect of the country on the basis of the "Meeting of Generations" project. Such waifas are being promoted. [4]..

Conclusion

It is worth noting that in today's global environment, in an environment of mutual competition, in a time when various political, economic, and ideological contradictions have intensified, it is urgent to educate young people to be sound-minded in all aspects, to raise their spirituality, and to form ideological immunity. remains. In this regard, it is an important task to form and educate the consciousness of the population, especially the youth, on the basis of enlightenment, to form their ideological immunity in the fight against ideological attacks. As we build an enlightened society in New Uzbekistan, first of all, we must organize the spiritual reforms being carried out in our country in harmony with conveying the fundamental essence to our people, improving the legal culture of the people, and teaching the rich history, scientific cultural and cultural heritage of our people, and national values. is important to do
